Education

Bachelor of Technology in Information Technology

Indira College of Engineering and Management, Pune

October 2024 – April 2028

CGPA: 8.6

H.S.C (Science)

Army Public School, Dehu Road, Pune

August 2022 – March 2024

Percentage: 82.8

S.S.C

Army Public School, Dehu Road, Pune

June 2016 – March 2022

Percentage: 89.33

Technical Skills

Programming Languages: C++, Python, JavaScript, SQL

Web Technologies: HTML, CSS

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Relational Database Concepts

Database: MySQL

Developer Tools: Git, GitHub, Visual Studio Code

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems

Spoken Languages: English, Hindi, Marathi

Personal Projects

SmartQueue – Digital Queue Management System | HTML, CSS, JavaScript, JSON

- Developed the frontend of a digital queue management platform designed to help shops manage customers and reduce physical waiting times.
- Designed and implemented the complete frontend from scratch using HTML and CSS, focusing on intuitive navigation and a simple customer-facing queue experience.
- Integrated the frontend with the team's JavaScript and JSON-based application workflow for managing queue and customer information.
- Collaborated as a frontend developer in a 3-member team and independently implemented the project's HTML and CSS components.

C++ Job Processing & Management System | C++, OOP, STL, Data Structures

- Developed a C++ application for creating, managing, prioritizing, searching, and processing jobs through a structured command-line interface.
- Applied object-oriented programming principles including encapsulation, abstraction, inheritance, and polymorphism to organize the application into modular components.
- Implemented STL-based data structures including `vector`, `unordered_map`, `set`, `queue`, and `priority_queue` for efficient job management and priority-based processing.
- Added file-based persistence, input validation, and exception handling to maintain job information and improve application reliability.

Certifications

Responsive Web Design – freeCodeCamp Certificate

Relational Database – freeCodeCamp Certificate

Microsoft Excel – Simplilearn

Leadership & Activities

Hackathon Team Lead – Sunhacks 2026

2026

Sandip University

- Led a 4-member team through registration, team formation, problem ideation, presentation development, and technical implementation.
- Developed the complete login page and dashboard frontend for an AI-assisted weather and agricultural advisory platform using HTML, CSS, and JavaScript.
- Integrated Gemini and OpenAI APIs as part of the team's solution for weather information and agricultural recommendations.
- Shortlisted among the Top 100 teams from approximately 1,000–1,200 participating teams and advanced to the Grand Finale.

Planning & Technical Lead – Department TechFest

2025

Indira College of Engineering and Management

- Planned and coordinated a technical event with approximately 40–50 participants featuring a technical quiz, debugging round, and final coding challenge.
- Coordinated technical rounds, event structure, participant management, and event execution.

School Captain

2024

Army Public School, Dehuroad, Pune

- Coordinated student activities, event planning, and team organization while serving as the school's student representative.
- Worked with students and faculty to support the planning and execution of school events and maintain effective coordination.
